

Company Profile: Novacore Technologies Pvt. Ltd.

History:

Novacore Technologies Pvt. Ltd. was founded in 2001 in Bangalore, India, with the vision of transforming digital automation solutions for businesses across Asia. The company started as a small software consultancy with just five engineers working on enterprise software for local clients. Over the next five years, Novacore built a reputation for delivering scalable, efficient, and reliable software solutions. Its early success was largely driven by custom ERP development and seamless systems integration for manufacturing units.

Growth and Expansion:

By 2010, Novacore had expanded its operations to cover not only India but several emerging markets in Southeast Asia, including Malaysia, Thailand, and Indonesia. It diversified its offerings to include mobile application development, cloud services, and business intelligence platforms. Its cloud computing division, launched in 2012, became a major growth driver, enabling mid-sized firms to move from legacy systems to scalable cloud platforms with minimal downtime and optimal data security.

Current Status:

As of 2025, Novacore Technologies operates in over 10 countries with major offices in Singapore, Dubai, and Berlin. The company has embraced artificial intelligence, machine learning, and advanced analytics to offer predictive business insights and automated decision-making tools for

enterprise clients. It employs a workforce of over 2,800 individuals, including more than 1,500 engineers and data scientists. Its major clientele includes Fortune 500 firms in the retail, logistics, and financial sectors.

Nature of Business:

Novacore's business is organized around four major verticals: Cloud & Infrastructure, Enterprise Applications, Data & AI Solutions, and Digital Experience Platforms. The company focuses on delivering digital transformation services that enhance operational efficiency, improve customer engagement, and support data-driven innovation. Novacore invests heavily in R&D, allocating nearly 12% of its annual revenue towards innovation labs located in Bangalore and Berlin.

Employees:

As of March 2025, Novacore Technologies employs 2,847 individuals globally. Approximately 42% of the workforce is involved in software engineering, 18% in data science and analytics, 20% in project and client delivery, and the remaining 20% in operations, marketing, HR, and corporate services. The company places a strong emphasis on employee well-being, career growth, and diversity. Over 38% of its leadership roles are held by women, and the average employee tenure is over 4.5 years.

Financial Performance:

Novacore Technologies - Last 5 Years Financial Summary (in Million USD)

Year	Revenue	Net Income	YoY Growth (%)
------	---------	------------	----------------

2020	312.5	29.3	-
2021	366.7	38.1	17.4%
2022	429.2	47.6	17.1%
2023	503.8	56.9	17.4%
2024	588.1	66.4	16.7%

The company has consistently delivered strong financial performance with a compound annual growth rate (CAGR) of over 17%. Its operating margins have improved with the adoption of hybrid cloud delivery models and growing demand for data analytics solutions.
